Custom Lumenate® Guidelines

Lumetta has the ability to make custom Lumenate® following your specifications. Whether you prefer to utilize our in-house design services or send us your artwork, we are pleased to accommodate your vision.

Under the “Custom” tab on our website, you can browse a few references to our [Custom Lumenate®](#) work.

In-house Design Services

Color Matching

Specify any color(s) from the Pantone® [Solid Coated](#), [Color Bridge Coated](#), or Sherwin-Williams® color guides and we will match it. Colors look different lit and unlit. Our goal is to match the lit version as closely as possible.

Lumenate® diffusers from select groups can also be adjusted to your request. Please inquire on the selections.

Customer-supplied Material

If you would like to incorporate your own material, please send us a sample. We will carefully evaluate if it is suitable for our Lumenate® manufacturing process.

Conceptual Design

We can collaborate with you to create custom imagery based upon a general design concept or a specific design objective.

Client-supplied Digital Art

Template Calculations

In order to create your own artwork, we ask that you request our manufacturing template. This will ensure artwork alignment with diffuser and frame measurements.

Contact your local sales representative to acquire template information.

Accepted File Formats

Adobe Illustrator (.ai or .eps)

Ideal for vector artwork

Adobe Photoshop (flattened .psd or .tiff)

Ideal for raster imagery

For questions regarding custom graphics, please contact your local [sales representative](#).
