provide premium
light output and
meaningful sound
absorption.**

Acoustic Collection

Lumetta's Acoustic Lighting: Creating a More Productive Environment

Lumetta's sound dampening Acoustic Collection enhances acoustical properties while decreasing noise and vibration in open space settings.

The L2 Acoustic Series luminaires provide the functional aesthetics of a colorful inner and/or outer acoustical shade. These vibrant luminaires are constructed of felt that has been color-selected to complement our full range of Lumenate® customizable diffuser outer shades. L2 pendants can be designed with both inner and outer acoustic shades or with the pairing of an acoustic and a Lumenate® shade. Lumetta's acoustic lighting solutions offer both form and function with a variety of bold-colored, sound dampening felt shade choices to enhance your L2 Acoustic luminaire designs.

Our Lumenate® diffusers are available in vibrant colors, hues and patterns and can be customized to match your colors and display graphics. Frames are made with high-quality steel and aluminum and are finished with durable and easy-to-use low VOC powder coat paint.

Our Linear Acoustic Series includes environmentally friendly 60% recycled PET designer board fiber felt and is available in 20 standard colors. This premium material is fire resistant, with an ASTM E84 Class A rating and is proudly manufactured in the USA by our partner, Sutherland Felt Co. Fabricated with welded steel and aluminum frames and finished with your choice of our durable powder coat colors, the rectilinear felt pendants offer up and/or down lighting.

The Linear Acoustic Series includes a wall sconce that absorbs and deflects noise and echoes while adding a colorful accessory to your wall. These sconces increase comfort and concentration and create artful wall appeal.

Lumetta's Acoustic Collection is utilized in commercial and architectural environments—from business sectors such as medical, hospitality, education, government, retail, office and more.

L2 Acoustic

The L2 Acoustic Series combines Lumetta's flair for multi-color creative expression with sound dampening features—producing a beautiful unison of exceptional design and acoustic function. Our acoustic fixtures are Sabin rated for sound absorption.

Lumetta offers an extensive range of our exclusive Lumenate®* shade patterns and colors or you can customize Lumenate® to your specific requirements. Lumenate® is available only through Lumetta.

**Lumenate®, is a flexible, washable, antimicrobial diffuser material that is exclusive to Lumetta lighting fixtures and can be fully customized to any specific color, pattern or design that you like.*

There are so many ways to express your creative vision!

Linear Acoustic

The Linear Acoustic Series provides a functional design with significant light output and effective sound absorption. Various sizes of rectangular luminaires will create clusters and arrays for optimal visual and acoustic comfort. Aluminum frames are surrounded with 9mm PET designer board felt and are available in any of our thirteen powder coat finishes.

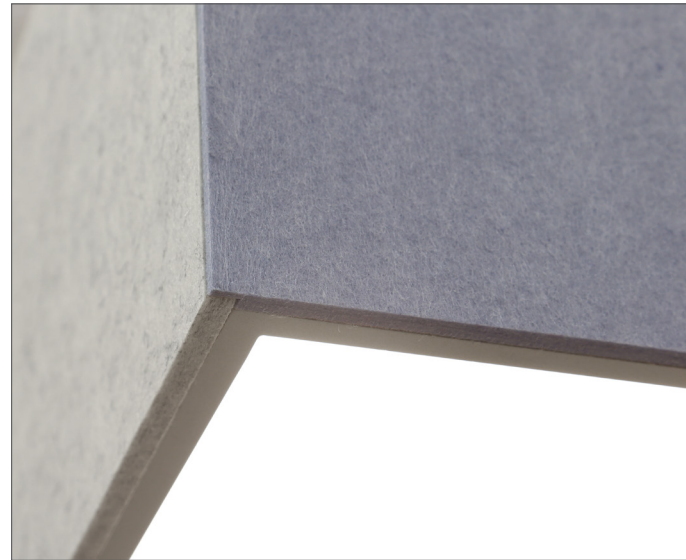

Luminaires P21618A shown with Acoustic shades D819 AC Pepper, D811 AC Periwinkle, D814 AC Navy, D808 AC Halo, D802 AC Marble and D816 AC Lime

Acoustic shades are offered in two designer board felt color configurations (adjacent orientation) as well as in a single color option. Corner lap joints, accent materials, strong lines, a 9mm profile and thoughtful transitions make for a harmonious design representing Lumetta's style and artful conception.

Shown are some of our standard color options: from top left to right: Designer board felt colors D805 AC Lemon, D810 AC Purple, D815 AC Pear, D811 AC Periwinkle, D816 AC Lime, D814 AC Navy, D819 AC Pepper
